-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Arguments

Applicant's arguments filed 9/9/04 have been fully considered but they are not persuasive.

Applicant argues the reference of record fail to teach scanning a part of a predefined search area. The Examiner disagrees. While the word scanner or sensor may not appear in the reference, the teaching is not absent from the reference. Yagyu et al. ('955) provides for detecting a predefined area. In item 2 of Yagyu, the term "sensor" is inherent. Figures 6A, 6B clearly illustrate a "part of a predefined search area." In view of such, it is believed the rejection is proper and in order.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 11, 19 – 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Yagyu et al. (US 5,899,955).

Regarding claims 10, 11, 19 and 20, Yagyu et al. teaches a system for scanning (detecting) a target portion of a predetermined search area, comprising a sensor (detector 2; fig. 1) for scanning the area from a starting point/cell (present position; col.

Art Unit: 3661

8: 27 – 37 at least); a computer (device 8) for analyzing output from the sensor (see fig. 1) and determining a destination point within the predefined search area (see fig. 5; col. 10: 19 – 33 at least) and scanning a second part of the area, the first and the second parts together comprising a part of the predefined area as large as the target portion (as illustrated in figs. 6A-6B at least).

Regarding claims 21 - 23, Yagyu et al. further teaches all of the limitations including determining total cost to travel through the cells (figs. 11 and 18, abstract and summary at least).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
